# POLICE CRIMINAL COMPLAINT

Above named defendant did recklessly engage in conduct which placed or may have placed another person or persons in danger of death or serious bodily injury in that he did operate a 1987 rust colored Pontiac 6000 e at an extremely high rate of speed east bound at W. 8th and Chestnut Streets which is posted at 25 mph and also failed to stop for a steady red signal then sped past this affiant as I was parked on the south side of W 8th St. in the 300 block in a marked Police Unit. There were also several pedestrians in the immediate area.

Above named defendant did fail to stop for a steady red indication at W. 8th and Chestnut Streets. This affiant was located in the 300 block of W. 8th St. and first observed the defendant in my rear view mirror and as I noticed the defendant approaching I glanced up at the traffic light, which lights in all four directions, and I observed the fact that the light was red. Defendant disregarded the steady red indication and proceeded eastbound at an extremely high rate of speed.

Above named defendant did drive a vehicle at a speed greater than is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing and at a speed greater than would permit the defendant to bring his vehicle to a stop within the assured clear distance ahead in that the defendant did operate a 1987 rust colored Pontiac 6000 e at an extremely high rate of speed, probably in excess of 70 mph in this affiant's estimation, in the area of W. 8th and Chestnut Streets east bound which would be neither reasonable nor prudent and would not allow the driver to stop in the assured clear distance.

Above named defendant did drive a vehicle in careless disregard for the safety of persons or property in that he did operate above mentioned vehicle at a high rate of speed in a posted 25 mph zone.

Above named defendant did operate above mentioned vehicle in willful and wanton disregard for the safety of persons or property by the nature of the speed estimated at probably in excess of 70 mph in the area of W. 8th and Chestnut Streets making no attempt to slow for a steady red indicator on the traffic light or for my parked marked Police Unit.

Above named defendant did fail to wear a properly adjusted and fastened safety belt while operating a motor vehicle upon a roadway.

### PRELIMINARY REPORT AND AFFIDAVIT

RE: George v City of Erie

I, Geoffrey P. Alpert, declare that the following statements reflect objective truth as extracted from records provided to me by Mr. Alan Natalie or represent my expert opinion, to the highest degree of professional certainty. If called to testify in this matter, I will express the opinions contained in this report unless provided with materials that change my opinions.

1. I have a Ph.D. in Sociology from Washington State University and have been conducting research on police and law enforcement agencies for the past twenty years. I have been awarded federal, state and local grants to investigate various aspects of police work. I have been awarded several fellowships to investigate police activities and I have been asked by numerous police agencies to write policies for them, conduct training and to consult with them on various issues. I have written more than 100 publications on criminal justice, many of which deal with police policies, customs and practices. I have written articles dealing specifically with emergency driving, pursuit driving and the use of force and deadly force. I am familiar with police operating procedures as well as the customs developed by practice. My current position is Professor of Criminology and Criminal Justice at the University of South Carolina. I have attached a copy of my curriculum vitae.

#### **2. The following materials have been reviewed:**

Complaint

252 Crash Records completed by City of Erie Bureau of Police 1996 - 2004.

City of Erie Bureau of Police - Police Vehicle Procedures

Special Order 1-95: Service Operations Officer/Response to Accidents Involving Bureau Vehicles

International Association of Chiefs of Police Model Policy: Vehicle Crash Review Process.

#### **4. Opinions:**

After having reviewed 252 Crash Records completed by City of Erie Bureau of Police from 1996 - 2004, several trends become clear. First, emergency equipment was utilized in 56 (22%) of the incidents. Second. An officer was cited in only 2 (.8%) of the incidents. Third, there was no written report in 56 (22%) of the crashes. Fourth, officers completed reports in 122 (48%) of the crashes. Fifth, there were supervisory reports filed in only 74 (29%) of the incidents. There is a

clear absence of supervisory involvement in the management of crashes at the City of Erie police department. In what should be a strong deterrent to misconduct, the lack of involvement by supervisors is likely to send the message to officers that they will not be held accountable for all their actions.

The City of Erie Bureau of Police Special Order 1-95: Service Operations Officer/Response to Accidents Involving Bureau Vehicles states: "The Service Operations Officer shall also maintain a file for all police vehicle accidents to aid in determining the need for any remedial training." This Order is appropriate and if the Bureau had kept proper information available to be analyzed, the Bureau managers would have realized that many crashes were occurring without supervisory reports being written.

Police departments must manage and control the use of their vehicles, and especially the history of crashes in which officers are involved. Crashes can be very dangerous to the public, and can create a threat to public safety. Police agencies must maintain proper records of officer-involved crashes. A reasonable police department will establish policies to investigate all crashes, have a supervisor investigate and write a report on all crashes and hold officers and supervisors accountable for not conducting themselves professionally, which includes the investigation and writing of reports for all crashes involving officers. As a example, in 1996 The International Association of Chiefs of Police (IACP) reiterated the professional standard by publishing a model policy on reviewing departmental vehicle crashes. They wrote in part:

"Motor vehicle crashes involving agency vehicles present serious potential risks to agency personnel and the public as well as considerable financial loss due to injury, loss of manpower, vehicle damage, and possible tort liability. Therefore, a motor vehicle crash review process has been established for evaluating crashes involving agency motor vehicles in order to determine cause and to institute corrective and preventive actions where possible."

The policy developed by the IACP includes a review board, but many departments use supervisory personnel to evaluate crashes and write reports. At a minimum, it is necessary to have a supervisor write a report for each and every crash involving a departmental motor vehicle.

Clearly, the IACP's model is effective but agencies are also including crashes in their Early Identification Systems (EIS) that can alert supervisors to a high number of crashes involving individual officers. The idea behind the EIS is to hold officers accountable for their actions.

An analysis of the Bureau of Police crash data for the years 1996-2004, shows a clear trend that they ignore this professional standard of care. By their actions and inactions, The City of Erie Bureau of Police has established a custom and practice of not having officers write reports for all officer-involved crashes. More important, the City of Erie has created a custom and practice of not having supervisors investigate and write reports on all officer-involved crashes.

The consequence of this failure to create a reasonable standard of care is that the police managers do not have a clear understanding of an officer who might be over-represented in crashes and in need of remedial training or who needs to be taken off the road. The data clearly show a lack of

care to the motoring public by not having supervisors create a record for each crash and knowing if there are patterns, such as high speeds, failing to utilize emergency equipment, failing to stop or slow sufficiently at intersections, etc. that contribute or cause crashes in which officers are involved.

I, Geoffrey P. Alpert, having been duly sworn state that the preceding opinions are true and correct to the best of my knowledge and belief.
